

Independent Dance is one of those organisations that has uniqueness woven through its very being. It is sometimes hard to pin down exactly what an 'Independent Dance experience' means. Throughout my time at the organisation I have been trying to do just that, having been intrigued in the beginning of how ID became so... well, ID. It hasn't taken taken me long to discover that attempting to harness all meaning behind ID down to one simple idea was taking me further and further away from all that ID stands for, and is probably about as useful as a chocolate radiator. ID is many things to many people, and through this exploration into its world, I intend to develop some questions that appeal to the root and core of ID. These questions will act as the answers and meanings themselves. These constantly shifting circular hypotheses seem appropriate to an organisation that is all about explorative movement. After all, ID is 'passionately curious' not 'indifferently logical'.
